

APGV Topics List (not exhaustive – just meant to get you thinking)

Locomotion in Virtual Environments
Distance Perception in Virtual Environments
Perception of Latency in Virtual Environments
Rendering – Perception of Details
Objects - Shape Perception
Objects – Visual and Haptic Properties
Facial Animation
Facial Expressions
Monitoring Human emotions
Monitoring physiological properties
Vision Realistic Rendering
Gaze Contingent Displays
Audio Rendering
Depth Perception
Motion capture
Motion Perception
Stereoscopic viewing
Material and Illumination Discrimination
Texture and Gloss appearance and modeling
Plausible animation
Plausible rendering
Color Appearance Modeling
High Dynamic Range displays
High Dynamic Range imagery
Perceptual equivalence between real and virtual scenes
Shadow perception
Virtual Reality systems
Head mounted displays
Augmented Reality
Eye Tracking
Gaze Based Interaction
Gesture Based Interaction
Image Fidelity Metrics
Gaze Manipulation
Motion Parallax
Attention and appeal of CG images and video
Uncanny valley
Scene understanding
Movement and perception of gender
Emotion and expression transfer to avatars
Visual perception in art
